

Rodents are a necessary evil our predators need them to survive..there are ways we can keep them out of our homes...keep them outside and let the predators take care of them WITH OUT POISON.

Rodent Proofing

First, the work has to go into prevention.
Remove the attraction and the animal will leave.

In the case of rodents

Food:

Fruit trees, overflowing trash (have secure tight lids), cat and dog food, dirty BBQ, bird feeders seed, suet anything edible.. certain cars wiring harness is made from soy, and even poison bait boxes are an attractant.

Living spaces:

All vines, wood piles, dense unpruned trees, anything stacked against the house, under open patios, check for cracks in the foundation. Basically any place that is small, dark and warm.

Block access to your home:

Fix tiny holes in the roof, doors or windows that don't completely close, drain pipes and some roof tiles stuff with chicken wire, foam sealer in air conditioning duct entering the house.

After all the attractions are removed you can incorporate some deterrents

Put up some Raptor perches and Barn Owl Boxes

Raptors are the solution

Deterrents for your car

Pepper tape

<https://mouseblocker.com/product/anti-rodent-repair-tape/>

Ultra Sonic for your car

https://mouseblocker.com/product/mouse-blocker-pro/?gclid=Cj0KCQiApvbhBRDXARIsALnNoK2cjcXdvl-53GDYMGOM3hd8Q3JmLfVLgp6BrjODMXy0t1oxJWkmKG4aAkH4EALw_wcB

Peppermint oil works great for deterring mice and smells great
Ultra sonic sounds.

Foam
